

AMENDMENTS TO THE CLAIMS

Claims 1-2 (currently canceled)

Claims 3-4 (previously canceled)

B1

5. (currently amended) A server comprising means for carrying out the steps of: ~~steps of the method according to claim 1:~~  
receiving a request for a file;  
identifying said file as being stored in a distant server;  
requesting said distant server to send said file; and  
identifying said file as being used, and forwarding said file;  
wherein said server further comprises a remotely logged client table for identifying where said file has been forwarded.

6. (currently canceled)

B2

7. (currently amended) A server comprising means for carrying out the step of: ~~steps of the method according to claim 2:~~  
receiving a request for said file, said request comprising a home server identification;  
checking that said file is not locally stored;  
requesting said file from said home server;  
identifying said file as being locally used; and  
forwarding said file;  
wherein said server further comprises a guest client table for identifying to whom said file has been forwarded.

8. (currently canceled)
